

# Download File PDF Accessing The Wan Exam Answers

#Jenny

Finally I get this ebook, thanks for all these I can get now!

---

#Rio

Cool! I'am really happy

---

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

---

#Hun Tsu

wtf this great ebook for free?!

---

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

---

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

---

## [Accessing the WAN Chapter 4 Exam Answers](#)

1. What is the best defense for protecting a network from phishing exploits?

Schedule anti-malware scans.

Schedule anti-spam scans.

Schedule training for all users.

Schedule operating systems updates.

2. Which two statements are true regarding network security? (Choose two.)

Securing a network against internal threats is a lower priority because company employees represent a low security risk.

Both experienced hackers who are capable of writing their own exploit code and inexperienced individuals who downloaded exploits from the Internet pose a serious threat to network security.

Assuming a company locates its web server outside the firewall and has adequate backups of the web server, no further security measures are needed to protect the web server because no harm can come from it being hacked.

Established network operating systems like UNIX and network protocols like TCP/IP can be used with their default settings because they have no inherent security weaknesses.

Protecting network devices from physical damage caused by water or electricity is a necessary part of the security policy.
