Two Formats For Writing Sensory Goals

RHUMBA goal format:

- R**-is the info/goal/outcome **relevant**?
- H**-does the info state **how long**?
- U**-is the info **understandable**?
- M**-is the info **measurable**?
- B**-is the info **behavioral** (can it be observed)?
- A**-is the outcome **achievable**?

SMART goal format:

- S**-Significant- meaning that achieving the goal will make a significant difference in this person's life?
- M**-Measurable-clear target to aim for, and that you will know when the client gets there?
- A**-Achievable- is it reasonable for the client to reach the goals in the allotted time?
- R**-Related- do the goals clearly have a connection to the client's occupational needs stated on evaluation?
- T**-Time-do the goals have a time limit?
